**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 77-96, 98, and 99, drawn to a method, computer system, and computer readable storage medium for generating and analyzing multi-factorial biological response profiles.

If this group is elected, an election from below listed Species I is required.

- II. Claim 97, drawn to a kit with recombinant constructs, agents, an electroporation device, and instructions.

The inventions of Groups I and II are distinct because Group I is a computerized method while Group II is a manual kit with agents and an electroporation device. Thus, the subject matter of the Groups would present a different and clearly distinct burden, which is undue, if searched together.

**Species Election for Group I**

This application contains claims directed to the following patentably distinct species:

Specie I-A: Wherein the response profiles are raw profiles (e.g. claim 88), or

Specie I-B: Wherein the response profiles are processed profiles (e.g. claim 89)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 77-87, 90-96, and 98-99 are generic to this species.

The species are independent or distinct because: The species are distinct because obtaining processed files requires additional processing of raw files and a database of raw files. The two types of files are distinct species and present a search burden which is undue if species are searched together.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.  
MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
